

YOUR FACILITIES. ONE PARTNER.

Empowering People to Do Good Work.

Electrical, lighting, technology, and facility services — done right. Big jobs, complex systems, tight timelines — we handle it all, from a single site to a coast-to-coast rollout.

WHY · WHAT YOU'RE UP AGAINST

Running facilities keeps getting **harder**.

You have facility challenges. We have Facility Solutions.

THE CORE PROBLEM

Vendor Sprawl

A dozen contractors, a dozen versions of the truth. Managing vendors isn't the good work your people signed up for.

THE ENERGY DRAIN

Rising Energy Costs

Lighting and HVAC drive over half of your building's energy spend — and most of its comfort complaints.

THE TICKING CLOCK

Aging Infrastructure

Every year of deferred maintenance raises the odds that downtime picks the day for you.

THE BLIND SPOT

Zero Visibility

Work happens across sites and states with no single view of status, spend, or performance.

WHY US · A GUIDE WHO'S BEEN THERE

We've seen every facility challenge since 1982.

From single-store retail to Fortune 500 portfolios — your challenge isn't new to us. FSG grew from a wholesale lighting supplier into a single-source facility partner — ranked #18 on EC&M's 2026 Top Electrical Contractors list — up four spots — with revenue up 60% in the last five years.

Empowering people to do good work since 1982 — ours, yours, and the communities we serve.

WHAT · YOUR SIMPLER PATH

One Partner. Every System. Every Budget. For Life.

Capital project or service call — same partner. FSG is vertically integrated: we design, fabricate, install, and support with our own people. One point of contact replaces your vendor list, so your people can get back to their good work.

HOW · YOUR THREE-STEP PLAN

Three steps. Zero **guesswork.**

1

Assess

We start with your needs — a walk-through of your facilities, systems, and spend. You get a clear picture and a right-sized design, before any commitment.

2

Execute

Our own crews deliver the work — self-performing, coast to coast, on schedule. One point of contact keeps you informed from kickoff to close-out.

3

Support

We stay for the life cycle — 24/7 support, proactive maintenance, and reporting that proves performance and value year after year.

HOW · EVERYTHING YOU NEED

Everything your facility needs. One **roof**.

Five lines. Three ways to buy. One partner.

	CONSTRUCTION Capital projects	SERVICE Programs & response	DISTRIBUTION Specified, designed & delivered
Electrical	Mission critical, ground-up, tenant finish-out, design-build, EV charging	Emergency, on-demand, preventive maintenance, arc flash analysis, infrared thermography, switchgear maintenance, generator programs, EV charging	Gear packages, wholesale materials, site logistics, EV charging
Lighting	LED retrofit, new install, design & photometrics	Lamp & ballast programs, national account maintenance, emergency lighting, MRO sourcing, retrofits, national rollouts	Owner-supplied packages, design & procurement, EBV® standard, design & photometrics, freight & logistics, wholesale materials, site logistics
Signs	Fabrication, install, rebrand rollouts, permitting	Maintenance, repair, permitting & surveys, permitting, retrofits, national rollouts	Brand packages, components, delivered to site
Technology Infrastructure	Structured cabling, AV, security, DAS	Moves / adds / changes, break-fix, monitoring, AV, security	Kitted devices, staged materials
Energy Performance	EMS installs, solar, EV charging, storage	EMS monitoring, alarm response, portfolio optimization, utility programs, retrofits, national rollouts, solar maintenance & monitoring, EV charging	EV chargers, solar equipment, EMS hardware, EV charging

Energy is the flywheel: every product we deliver — electrical, lighting, signs, technology infrastructure, energy performance — is built to **reduce your energy spend** and make your facilities **efficient and effective**. Energy data sees the problem across HVAC, lighting, refrigeration, and signs; FSG **self-performs the fix** from 43+ offices. Monitoring platforms can watch. **We fix.**

HOW - WHEREVER YOU OPERATE

Across the nation. Around the **corner.**

- **43+ locations — U.S., Canada & Puerto Rico**

Local crews with national consistency — plus 6 new service locations opening now.

- **24/7/365 call center**

500+ support guides ready when comfort, safety, or operations are on the line.

- **One point of contact**

A centralized model that saves you time across every site and work order.

- **Emergency call to nationwide rollout**

Scale, speed, and precision — whenever, wherever you need it.

- FSG Service Locations
- Master Distribution Centers
- Upcoming Locations
- Certified Affiliate Technicians

HOW · YOUR PEOPLE, PROTECTED

Everyone goes home **safe.**

.73

EMR — well below industry average

.18

TRIR — categorically low

.14

DART rate

4.4M+

Safe man-hours worked

WHY IT MATTERS TO YOU

Good work starts with safe work

Accredited 3-day safety onboarding, a 4-year craft education program, and an ISO 45001-aligned safety management system mean fewer incidents, lower liability, and work that doesn't stop.

WHAT YOU GET

What **winning** looks like.

When one partner owns every system, the noise goes quiet.
National strength with local accountability — your facilities simply work, and your people get back to the good work they're there to do.

Worried about one basket? Concentrated accountability is leverage — one partner who owns the outcome beats a dozen vendors pointing at each other.

The cost of doing nothing: more vendors, more downtime, more energy dollars out the door — every month.

- **Confidence**

Experts own your project end to end — it's in the right hands.

- **Time**

One point of contact replaces a dozen vendor threads.

- **Visibility**

Reporting and analytics show status and spend, every site, in real time.

- **Peace of Mind**

Nationwide coverage and 24/7 support — help is always close.

HOW · THE FSG LOOP

Ninety days. One problem. **Solved.**

1 · PROBLEM

Name it

We start with the problem, not a pitch. The walk-through names the specific problem costing you money, time, or sleep — in writing.

2 · SOLUTION

Build it

Designed, scoped, and self-performed by FSG crews — one accountable partner from plan to power-on.

3 · MEASURE

Prove it

Results verified at the meter and reported live — savings, uptime, and delivery measured against the plan, not the promise.

4 · MAINTAIN · REPEAT

Then again

We keep it performing for life — then take the next problem, the next category, the next set of sites. The loop runs again.

That loop is how one facility becomes a portfolio — it's how an EMS challenge at Circle K grew into six categories and \$300M+ delivered.

"The reporting alone changed how we run capital programs." — Liz Perez, Senior Project Manager, JLL — U.S. Bank Account

HOW WE PRICE

A proposal that defends its **price.**

We'll talk about money before you have to ask. Every FSG proposal is built to survive procurement — and to still make sense in year five.

Lowest bid and lowest total cost are rarely the same number. We compete on the second.

- **Transparent scopes**

Every line item visible — you see what you're buying and why.

- **Standardized national pricing**

One contracted price for materials and labor across every site — the model behind 9,000 Starbucks stores and 354 U.S. Bank branches.

- **No change-order ambush**

Surprises are scoped out up front. If conditions change, you approve before we proceed.

- **Savings guaranteed in writing**

On energy performance work, the ROI is in the contract — proven at the meter.

OUR PROMISE TO YOU

Empowering People to Do Good Work.

Our people — *empowered with craft, careers, and pride.*

Your people — *freed by facilities that simply work.*

Our communities — *strengthened by work done well.*

NEXT · YOUR FIRST STEP

Let's start with **one** **facility.**

*A no-cost facility assessment: we walk one site, map the systems
and the spend, and hand you a clear plan **and the numbers** —
projected savings, cost, and timeline — whether or not you build
it with us.*

SCHEDULE THE WALK-THROUGH

*A trusted advisor working in your best interest, protecting your investment.
